SPECIALITIES FOR LADIES

The great demand that has arisen for innocent, safe, and simple methods by which mothers may limit their families according to their means. It may be useful to give explanations of a few appliances that are recommended by Medical Men to delicate married Ladies, who cannot with safety bear children, and to those to whom injudicious and rapid child bearing is an affliction and an obstacle to progress in life.

The necessity for so doing is enjoined by reason, and approved by conscience, since it prevents poverty and preserves health. This together with the fact that the number of the family can be regulated without injury to health or the violation of moral principles, renders it not only a right but a duty to avert conception under the circumstances mentioned.

In giving a description of a few out of many cases which have been successfully treated by me, I have avoided the mention of any names in full. I would not give pain to my patients by publishing their ailments to the world, but the initials will be known to many who will readily testify to the truth of the statements.

Dear Madame,

I have just returned from a visit to a lady friend of mine, whom I have not seen for some time. Her little girl is two years old. She used to have family so rapid that I scarcely ever saw her without a baby in arms. During conversation she told me that the doctor said if she had family so fast it would ruin her health, and she said that it was your remedy "Antifamiline" that kept her regular, and advised me to send for a supply, for which I enclose postal order 11/-. Please send by return. I hope it will have the desired effect.

Yours truly,

Mrs. F. C. H.
